

SOLUTIONS FOR HEALTHCARE

PROVIDE CARE WITH CONFIDENCE

Ensuring the health and safety of occupants, supporting the care environment to enhance comfort and improve patient experiences, and reducing energy consumption and emissions are requirements to meet the needs of today's healthcare facilities. Building managers also require precise control, uninterrupted reliability, extraordinary reporting capabilities and more.

With a range of intuitive products, we can optimize the way you control and monitor heating, air conditioning, lighting and other essential building systems. Our [WebCTRL® building automation system](#) will help you fully understand your operations, better analyze results, and ensure compliance with regulatory requirements so you can manage your buildings with confidence.

MEETING HEALTHCARE FACILITY NEEDS

Automated Logic is uniquely positioned to help address some of the most common industry challenges:

Reduce Operating Costs and Save Energy

Optimize building systems and diagnose issues proactively, while monitoring and sharing key performance indicators for managing operating costs.

Optimize Equipment Operation

Get predictive, actionable insights into the health of your HVAC assets so our service experts can advise on proactive maintenance and energy saving strategies.

Ensure Comfort for Patients, Families and Staff

Meet regulatory requirements for environmental conditions to help increase staff productivity and improve patient comfort.

Centralize Management Across Your Entire Network

Bring all of your equipment, facilities and assets together under one platform, so you can respond to alerts or manage schedules, setpoints and alarms from a single location.

COMPREHENSIVE HEALTHCARE SOLUTIONS

Our [healthcare](#) solutions help you improve efficiency, comfort, and control in your facilities.

- Building Automation & HVAC Controls
- Environmental Monitoring & Control
- Analytics & Fault Detection (FDD)
- Critical Alarming
- Systems Integration
- Data Visualization
- Demand Control Ventilation
- Energy, GHG and ESG (Compliance) Reporting
- Indoor Air Quality (IAQ) Sensing
- Pressurization Monitoring & Control
- Isolation & Operating Room Control
- Purge Ventilation

COMPLETE SOFTWARE SUITE

ABOUND | Net Zero Management

Improve visibility and tracking of energy usage and greenhouse gas (GHG) emissions so you can take action and report on progress.

ABOUND | Predictive Insights

Enable proactive maintenance strategies and manage your facilities more effectively with advanced data analytics and advisory services from our staff of experts.

Automate your building for improved comfort and efficiency with our industry-leading building automation system.

SUCCESS STORIES

To realize their vision of becoming a model for transformative, sustainable practices, **Emory Healthcare** turned to Carrier and Automated Logic for innovative building technologies at their cutting-edge Musculoskeletal Institute (MSKI) in Atlanta, Georgia. With the WebCTRL® building automation system from Automated Logic at the core of their enhancements, the MSK Facilities Team was able to achieve their sustainability and energy-efficiency goals while creating a healthier and more comfortable environment for patients and staff.
